PROFILE

I'm an Associate Software Engineer with a background in Mechatronics and C++ development. I have a keen interest in IoT technologies and enjoy working on mini-projects involving microcontroller-based PCBs. Recently, I've turned my 3D-printing hobby into a scalable business named Detalii3D, managing product design, small-batch production and e-commerce.

SKILLS

- C, C++ Development
- Microcontroller Programming
- IoT Technologies
- 3D Printing and 3D Modeling
- Python (beginner)
- E-commerce

EXPERIENCE

ASSOCIATE SW ENGINEER - HARMAN INTERNATIONAL
2022 - present

- **UFT tool for MBCC** (current) — Developing the MBCC Unified Flashing Tool (UFT), a Python (PySide6) GUI-driven orchestrator that provisions and flashes IVI/IDC hardware. Responsible for job orchestration and a factory of pluggable flashers for different target types, debug-board detection (VID/PID) and port mapping, archive extraction, per-step logging, and a dummy mode for CI/dry-runs. It implements platform-specific execution of vendor provisioning/flashing scripts on Windows and Linux, ETA-based progress estimation, and ASPIICE-traceable logging and configuration.
- **Daimler — Infotainment** — Built and maintained the microservice-based interface layer that routes UI requests to external ECUs and implements the business logic and message-translation (Thrift-based RPC). Worked on high-throughput data processing for steering-wheel and touchpad inputs and led cross-domain integration (Time Manager, Dashboard Camera, Car Data). Performed requirements analysis, system/integration testing and customer communication. Tools/stack: Thrift.Me, Mocca, Docker, Git (Gerrit / Stash), Jira, Confluence, Bamboo, DOORS.

EDUCATION

FACULTY OF MECHANICAL ENGINEERING AND MECHATRONICS

Politehnica University
2019 - 2023

MASTERS IN ADVANCED MECHATRONICS

Politehnica University
2023 - present

INTERNSHIP - WIPRO TECHNOLOGIES
july 2021 - september 2021

- Gained experience in unit testing and implemented the Frama-C framework on virtual machines.
